

The 2005 MedChild report has been designed and edited by Lynkeus, like the previous edition of *Charting the Mediterranean Child*, published in January 2004. The new Report updates all the relevant indicators and broadens significantly their number. This year’s issue of *Charting the Mediterranean Child* includes also ten thematic papers, contributed by collaborating organizations and research consultants, all of which have also been involved in thoroughly checking and revising the statistical section, making of it a consensus report.

Editor: Lynkeus (Rome)

Published by: Fondazione Medchild (Genoa)

Sponsored by: Compagnia di San Paolo, Torino

Authors of thematic papers

Jacques Van der Gaag (University of Amsterdam), Erika Dunkelberg (The World Bank)
